

COVID-19 Antibody Testing Now Available

Vitalant is now testing blood donations for COVID-19 antibodies.

- Do not donate if you are sick or are awaiting SARS-CoV-2 swab testing results to explain a recent illness or after contact with a COVID-19 positive individual.
 - This antibody test does not test for the presence of COVID-19 disease.
- All successful donations will be tested for antibodies to SARS-CoV-2, the virus that causes COVID-19.
- Please check your online donor account for results available within approximately 2-3 weeks after donation.
- Look for an email with instructions on how to access your online account.
 - Provide your email during registration to activate your online account post-donation. If you already have an account, you can login with your username and password to view your test results.

NOTE: Testing is being offered in lieu of reward points for whole blood donors. Apheresis donors will also be tested and remain eligible to receive reward points for each donation.
